

Our combines work over 350,000 farms worldwide.
But our newest was designed for **Y O U R S .**

*Our exclusive V-Cool™ System
conserves fuel and keeps engine
at optimum temperature.*

WHETHER YOUR CROP is corn, wheat, barley or canola, we both know harvesting is more challenging than ever. And you demand more. More horsepower and capacity to put more product in the grain tank faster. At the same time, you want less – less downtime and fuel consumption. So Massey Ferguson® gathered ideas and technologies from our engineers around the globe. Then we created a combine for one very particular farmer: you. The MF9540 and MF9560. See your dealer or go to masseyferguson.us

MASSEY FERGUSON is a worldwide brand of AGCO.
