Will Work *for* You

With two just-released models, Massey Ferguson® tractors move customer choice a notch higher.

MASSEY FERGUSON HAS long been known as the leader in compact and mid-range tractors. Now, two new models go a step further with increased efficiency, innovative design and greater usability.

Recently introduced to the public, the MF5450, at 75 hp, offers the best visibility over the hood of any tractor in its class, while the MF1526, coming in at 25 hp, let's you tackle a host of small jobs in a big way.

my**FarmLIFE**.com

For more information on the MF1526 and MF5450, visit your local Massey Ferguson dealer or www.masseyferguson.com.

5450: *Ultimate Loader Tractor*

WHILE ITS SLOPE doesn't quite match the downhill run at Aspen, the Hi-Visibility™ Hood of the 5450 gives operators exceptional sight lines and eliminates blind spots. In fact, no other mid-range tractor on the market features a hood with the visibility of the MF5450, making it perfect for loader

work and allowing the operator more control and accurate results, as well as promoting safe operation through enhanced visibility.

"It's a unique tractor," says René Boivin, product marketing manager, utility, specialty and mid-range tractors. "It's designed for
