

## New from Gleaner

Don't leave your profit in the field. Auger headers waste and miss valuable crop especially in soybeans. The 9250 DynaFlex™ is a flexible cutterbar draper header available in up to a 40-foot width. Its patented design controls the soybeans from cut to feeder house resulting in smooth feeding, less loss, less spiking of material and more crop harvested.

Get your best harvesting results with the control and solid mechanical construction of a fully flexible cutterbar draper header. Take control of your harvest with DynaFlex.

## Limited-time pre-order program

Contact your Gleaner dealer to pre-order in time for your next harvest.
