

IF YOU'RE LOOKING FOR A NEW PLANTER, START BY LOOKING AT AN OLD ONE.

The true test of a planter is how well it holds up after years of use. And if you look at an old White Planter, you'll see that it doesn't have seals, kickers or many of the things those other brands require you to replace on a regular basis. That's because a White Planter uses pressurized air instead of suction, and that means it has far less moving parts to wear out or cause problems.

Ask a White Planter owner and you'll hear that the legendary White Planter is just as accurate after years of use as the day you buy it. With less maintenance, better accuracy and a simple, yet advanced system, you'll see that only one other planter is as good as an old White Planter is a new one.

WHITE
P L A N T E R S
SIMPLY ADVANCED

- ISOBUS Compatible
- Integrated Display – AUTO-GUIDE & Planter Control
- Pre-set Seeding Populations

- Variable Rate Seeding
- Infinite Seed Rates
- Seed Monitoring
