

Not all bales are created the same.
Now you can know the difference.

INTRODUCING THE **HayBoss G2 RFV Calculator**

The G2 RFV Calculator accurately calculates and records the Relative Feed Value (RFV) for every large square bale produced.

- No need to core bales
- Sort and stack hay by RFV or Total Digestible Nutrients (TDN)
- Sorting and feeding consistent quality hay can increase milk production by up to 4 lbs. per head, per day
- Market and sell your hay at a premium by identifying the quality of each bale

When combined with the other HayBoss G2 products, you can manage bale moisture and value better than ever.

Contact your local AGCO dealer for details or visit AGCOparts.com/Hay/HayBoss for literature.

Scan the QR Code for an informational video on the AGCO HayBoss G2 RFV Calculator.
